

RESULTS

2015-2019

RESULTS 2015-2019

IN VITRO FERTILIZATION (IVF) and ICSI with own oocytes or with egg donation

	Own Oocytes				Egg Donation
	Total	< 35 years old	35-39 years old	>=40	any age
Cumulative clinical pregnancy rate per egg's retrieval (%)	73,24	89,23	66,33	40,85	77,02

Results of transfer of fresh or vitrified blastocysts, per egg's retrieval or per egg donation.

RESULTS 2018-2019

Treatments with Pre-implantation Genetic Technique for Aneuploidies (PGT-a)

PGT- a

any age

Cumulative clinical
pregnancy rate (%)

58,99

Results of transfer of healthy blastocysts

RESULTS 2015-2019

Artificial Insemination (<40 years old)

	IAH	IAD
Cumulative clinical pregnancy rate (%)	40,31	67,58

IUI results with partner sperm (IAH) or with anonymous donor sperm (IAD) after three attempts

RESULTS 2015-2019

*Results of this report are expressed as **cumulative clinical pregnancy rate**, that is the chance of having a viable pregnancy confirmed by ultrasound, starting from the oocytes retrieved in one egg's retrieval.*

In no cases more than two embryos have been transferred.
